Open to Remote / Hybrid / Relocation (North, West, Central India) | Immediate Joiner

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience designing, building and deploying web applications using React.js, Next.js, Node.js, Express.js, MongoDB and AWS. Shipped 4-5 client products, including a VR campus tour platform for US EdTech firm College Match Pros and a VR training system for defence (Tata Advanced Systems), and currently owns all technology for a US-based e-commerce brand. Combines hands-on development with product skills (PRDs, stakeholder demos, team leadership) and AI-assisted delivery using Claude Code and Cursor.

SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, Python, C, C++
Frontend: React.js, Next.js, Tailwind CSS, Responsive Design, Figma
Backend: Node.js, Express.js, REST APIs, Authentication, SSO (Clever, ClassLink), Role-Based Access Control
Databases: MongoDB, MySQL, Azure Cosmos DB
Cloud & DevOps: AWS (EC2, S3, IAM, Route 53, CloudFront, RDS, Lambda, Amplify, ACM), Azure (Cosmos DB, Blob Storage, App Service), Vercel, Firebase, Linux (SUSE), CI/CD, Git
AI Tools: Claude Code, Cursor, GitHub Copilot, OpenAI Codex, Lovable
XR & Devices: Unity, Blender, Pico, Meta Quest, Apple Vision Pro, MDM (Meta Horizon, Pico Business Suite, ManageXR, ArborXR)
Product & Tools: PRD Writing, Requirement Gathering, Stakeholder Management, Feature Prioritisation, Jira, Postman, WordPress

PROFESSIONAL EXPERIENCE

Software Engineer | Fore Excel Pvt. Ltd. | Pune, India **Jun 2024 - Present**

- Delivered 4-5 client products and 2-3 internal products end to end, from PRDs and stakeholder meetings to timelines, proof of concepts, prototype demos and on-field testing.

College Match Pros (US EdTech) - VR Virtual Campus Tour Platform | Jan 2025 - Oct 2025

- Worked directly with the client's CEO from discovery to delivery; designed the UX for both the Unity VR app and the admin dashboard, and shipped the platform in 3 months with a 2-member team.
- Built the admin dashboard end to end (Next.js, React, Node.js, Express.js, Tailwind CSS) with a Figma-like free-form canvas to place 360-degree location images spatially, giving VR users a true layout of each campus.
- Built REST APIs on Azure (Cosmos DB, Blob Storage) to serve ~50 campus tours with 360-degree images, location labels, audio narration, filters (GPA, region, HBCU, Ivy League) and in-app surveys to the VR app.
- Integrated Clever and ClassLink SSO to auto-sync US student data, with role-based access for school districts, principals, students and individual users.
- Managed a fleet of ~50 VR headsets remotely via ManageXR post-launch, pushing updates and supporting the CEO; platform featured on The Baller Alert Show (US podcast).

Tata Advanced Systems, Tata Technologies and Pune Customs

- Built an admin web dashboard (Next.js, TypeScript, Tailwind CSS, Node.js, Express.js) for a Unity-based VR training system on Pico 4 Ultra Enterprise headsets used in defence, enabling user monitoring, role management and pushing of images, videos, PDFs, audio and 3D assets over intranet.
- Set up 2 on-premise servers (dev and production) on SUSE Linux for Tata Advanced Systems, covering networking, deployment and CI/CD.
- Led scoping, feature prioritisation and timelines for Tata Technologies' 2-phase AR and VR upgrade of its e-learning platform (hundreds of courses); designed all VR panels and co-led 6-7 interns building Node.js REST APIs on Azure Cosmos DB.
- Redesigned and delivered the Pune Customs government website solo in 1 week using Next.js, React.js, TypeScript and Tailwind CSS, following government web guidelines; deployed on Vercel for stakeholder review.
- Mentored interns through code reviews and daily standups; 2 were hired full-time.

Red Stone USA Inc. (US sister company) - Sole Technical Lead, Remote

- Own all tech decisions; redesigned the website and built an e-commerce platform with an admin dashboard.
- Built and deployed an internal CRM replacing Google Sheets-based workflows; driving ongoing bug fixes and workflow improvements.
- Handle client support for Meta, Pico and Apple Vision Pro headsets and MDMs (Meta Horizon, Pico Business, ManageXR, ArborXR).
- Cut delivery time by using AI coding tools (Claude Code, Cursor) to build and ship projects independently.

Technical Associate | Dexian | Pune, India **Jul 2023 - May 2024**

- Built feature logic in vanilla JavaScript for client apps; tested APIs in Postman, tracked work in Jira, used Git, and prepared release docs.

WordPress Developer (Freelance) | Hortus Rudra Pvt. Ltd. | Pune, India **Nov 2022 - Feb 2023**

- Built custom WordPress Elementor websites with call and chat integrations, SEO optimisation and PHP/CSS customisations.

Full Stack Developer Intern | Hezkrost Technologies | Pune, India **Oct 2021 - Apr 2022**

- Built and deployed a web app solo (linkedlabs.co) plus sites hezkrost.com, theonehour.co and mynaukri.co.

EDUCATION

B.Tech, Electronics and Telecommunication | Bharati Vidyapeeth University, Pune | GPA: 9.2 **2019 - 2023**

CERTIFICATIONS & COURSES

AI Product Manager Course, AirTribe (In progress) | Programming with JavaScript, Coursera (Feb 2023) | Introduction to Front-End Development, Coursera (Oct 2022)
